The Facts

- A person with Glanzmann’s Thrombasthenia has blood that does not clot like it should.
  - It affects males and females equally.
  - Very rare platelet disorder.
  - Bleeding can range from mild to very severe.
  - The only cure is a bone marrow transplant.
  - It is a life-long condition.
- People with Glanzmann’s Thrombasthenia do not bleed faster than normal but have a harder time stopping the bleeding.
- It may take medicine to help control the bleeding.
- People with Glanzmann’s Thrombasthenia cannot make a strong clot.

Common Bleeding Issues

- Frequent and prolonged nosebleeds
- Nosebleeds that are difficult to stop (may take hours to stop)
- Bleeding after invasive procedures
- Bleeding into joints or muscles
- Bleeding with minor cuts and scrapes
- Heavy bleeding during menses for females

School Considerations

- Some people with Glanzmann’s Thrombasthenia require frequent intravenous medications and/or blood products to prevent bleeding episodes. Please allow for frequent absences and help with making up assignments.
- Patients may also require oral medications to help treat or prevent bleeding. This medication may need to be taken at school.
- Please allow for frequent bathroom breaks for females with this disorder.
- Please allow for a 504 plan if needed.

First Aid for Minor Bleeding

- Rest, Ice, Compression, Elevation
- Cuts and scrapes: clean, apply pressure, and bandage
- Nosebleeds: hold head straight (not back) and apply pressure
- Mouth bleeds: apply ice or cold compress
- Headache (not from injury): give Tylenol only. If not relieved in two hours or accompanied by other symptoms, contact the parent.

Emergency Bleeding

- Head: nausea, vomiting, headache, confusion, blurred vision, loss of consciousness
- Eye: trauma and bleeding into and around the eye
- Neck and throat: pain, swelling, difficulty swallowing or breathing
- Abdomen: trauma to abdomen, acute tenderness, pain or swelling

In an Emergency:

- Call 911.
- Inform the parent.
- Notify EMS the child has a bleeding disorder.
- Contact the Hemophilia Treatment Center.
Benefits of Physical Activity

• Promotes overall physical fitness by improving
  ° Cardiovascular fitness
  ° Muscular fitness
  ° Bone health
  ° Body composition/weight
  ° Cognitive function
  ° Academic performance
  ° Sleep
  ° Self-esteem
  ° Self-confidence
  ° Energy
• Reduces feelings of anxiety and depression
• Reduces fatigue
• Increases balance and coordination
• Promotes a spirit of participation and involvement
• Lowers the risk of
  ° Spontaneous joint bleeds
  ° Heart disease
  ° Stroke
  ° High blood pressure
  ° Type 2 diabetes
  ° Colon cancer

Which Sports Are Safe?

• AVOID HIGH-IMPACT SPORTS such as football, boxing, hockey, rugby, and wrestling.
• Encourage low-impact sports such as running, aquatics, and golf.
• Always consult parents regarding any participation in sports.
• Look for activity ratings in the Playing It Safe materials provided by the National Hemophilia Foundation.

Bruising is a common occurrence for people with congenital bleeding disorders
